

fromm® *Family* **PET FOOD**

2026 NUTRITION REFERENCE GUIDE

A tradition of **QUIET INNOVATION**

1851-1852

Due to the scarcity of land and opportunity in Germany, the Fromms and Niemans immigrate to the United States of America where land and opportunity are plentiful. They settle in Cedarburg and West Bend, Wisconsin.

1883

Dairy farmer, Fredrick Fromm, marries Alvina Nieman. Alvina receives a 160 acre farm as a wedding gift from her father Joachim Nieman. Alvina and Fredrick go on to raise nine children together including Walter, Edward, John, Henry, and Erna.

1904

Walter, Edward, John and Henry Fromm form "The Company" on their family farm in Hamburg, Wisconsin. The brothers, ages 10-16, start growing ginseng in a small area of land their father allows them to use.

1916

Alvina Nieman-Fromm declares, "What good is land unless it gives a family a start in life?" and co-signs a \$6,800 loan with her farm as collateral to purchase 3 silver foxes for the four Fromm brothers to continue to carry out their business plan.

1925

Fromm Bros. Nieman Company builds its own food manufacturing plant in Mequon, Wisconsin. This allows them to continue producing their own nutritionally-geared recipes at a volume sustainable to their growing demands.

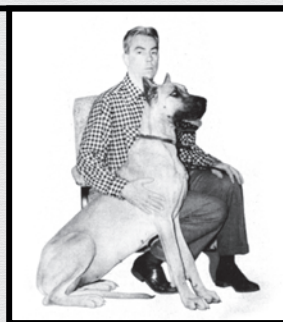

1939

Fromm Laboratories is the first to develop and market a fox, canine, and feline distemper vaccine.

1941

Nieman's Meteor "Fresh/Frozen" Raw Dog Food is sold and marketed as the first scientifically formulated dog food produced by an animal food company producing food for their own use.

1940s

With the expertise of Willard "Doc" Roberts, PhD, Fromm begins the research and development process to create the first complete and balanced dry dog food utilizing feeding trials with more than 50,000 foxes and dogs.

1949

Complete & balanced dry dog food is born. Fromm Complete Dog Meal is marketed with the tag line, "Fifty-thousand foxes can't be wrong," referencing Fromm's extensive, unprecedented, scientific feeding trials.

1970s

Fromm ventures into lifestyle-specific formulas with recipes like "Hi-Stress" food for working dogs.

A Century of Excellence in Pet Nutrition

Every pet deserves a diet that supports their overall health and well-being. At Fromm, we understand that each animal is unique, which is why we've developed a range of nutritional options to meet the needs of dogs and cats at every life stage—from playful puppies and kittens to senior companions.

Our products are more than just food; they represent a commitment to a pet's lifelong wellness. Each formula is designed to deliver essential nutrients to promote optimal growth, lasting energy, a strong immune system, and a healthy coat. Whether nurturing a growing pet, maintaining the health of an adult, or caring for a senior's specific needs, Fromm offers products that help ensure pets thrive at every step of their journey.

Fromm Family Foods is proud to be a 5th-generation, family-owned-and-operated company. With over a century of experience in animal nutrition, our formulations reflect our commitment to the highest standards of quality, research, and care. Our tradition of excellence continues to guide the development of advanced, research-driven nutritional strategies that enhance the quality of life for companion animals.

This comprehensive guide provides detailed, technical information on the nutritional content and intended benefits of each Fromm product to empower informed dietary recommendations for each pet.

As a PhD Animal Nutritionist, I am deeply committed to ensuring that every pet receives optimal nutrition. Fromm's dedication to quality, scientific innovation, and the vitality of animals is a testament to the compassion and care that go into every formula. It is an honor to support the well-being of companion animals and provide peace of mind to pet owners and veterinary professionals alike—knowing that every meal contributes to a lifetime of health, happiness, and longevity.

Sincerely,

Dr. Danielle Opetz

Doctor of Companion Animal Nutrition

INGREDIENTS: Salmon, eggs, dehydrated salmon, chickpeas, peas, tapioca starch, pork liver, pea protein, pea flour, salmon oil (preserved with mixed tocopherols), sunflower oil (preserved with mixed tocopherols), natural flavor, dried plain beet pulp, ground miscanthus grass, flaxseed, DL-methionine, potassium chloride, Vitamins [choline chloride, Vitamin E supplement, niacin supplement, ascorbic acid, calcium carbonate, pyridoxine hydrochloride, Vitamin A supplement, folic acid, calcium pantothenate, thiamine mononitrate, riboflavin supplement, Vitamin D3 supplement, biotin, Vitamin B12 supplement], salt, taurine, dried chicory root, Minerals [zinc sulfate, manganese sulfate, ferrous sulfate, magnesium sulfate, zinc proteinate, iron proteinate, manganese proteinate, copper sulfate, magnesium proteinate, copper proteinate, calcium iodate], yucca schidigera extract, sorbic acid (preservative), sodium selenite, dried Lactobacillus casei fermentation product, dried Lactobacillus reuteri fermentation product, dried Lactobacillus acidophilus fermentation product, dried Lactobacillus plantarum fermentation product.

NUTRITIONAL ADEQUACY STATEMENT: Fromm PurrSnickitty™ Salmon Splendor Recipe Food for Cats is formulated to meet the nutritional levels established by the AAFCO Cat Food Nutrient Profiles for All Life Stages.

fromm®

Family PET FOOD

Wet Food for Cats

Made in Wisconsin

Prepared in controlled batches at our fifth-generation, family-owned-and-operated facility.

Formulated with Real Meat

Provides essential amino acids for muscle development and maintenance.

Moisture-Rich

High moisture content supports hydration and maintains a healthy digestive system.

Balanced Nutrition

Formulated with essential nutrients to support a shiny coat, a strong immune system, and optimal overall health.

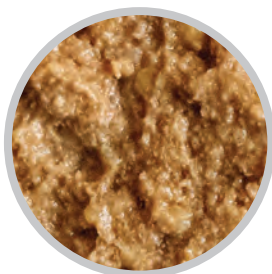

Enriched with Omega Fatty Acids

Contains essential omega-3 and omega-6 fatty acids to support healthy skin and cognitive function.

FROMM GOLD KITTEN CHICKEN & DUCK PÂTÉ FOOD FOR CATS

- High-quality proteins to support muscle development and maintenance
- DHA and EPA from salmon oil for neurocognitive development and overall health
- Calcium, phosphorus, and other vital minerals to promote strong bones and teeth
- Antioxidants to support a kitten's developing immune system
- High moisture content to enhance hydration and supports overall health

RESOURCES

CANINE & FELINE | BODY CONDITION SYSTEM

UNDERWEIGHT

1

Ribs, backbone, pelvic bones, and other bony prominences are clearly visible and protrude. Muscle mass is severely diminished with no noticeable body fat. Both cats and dogs show a severe tummy tuck and sharp waistline.

2

Ribs, backbone, and pelvic bones are visible, with only slight muscle mass loss. There is no palpable fat, and both the waistline and tummy tuck are dramatic.

UNDER IDEAL

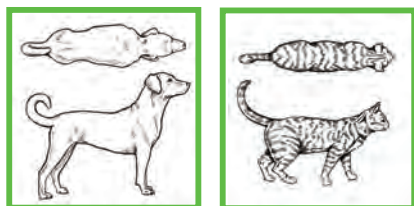

3

Ribs, pelvis, and backbone are easily palpated and somewhat visible, with a distinct waistline and tummy tuck present.

4

Ribs, pelvis, and backbone are easily palpated with minimal fat covering. There is an obvious waistline and tummy tuck.

IDEAL

5

Ribs, pelvis, and backbone are palpable without excess fat covering. The waistline and tummy tuck are noticeable but not extreme, with more gradual curves. Cats are well-proportioned with minimal abdominal fat pad in front of the rear legs.

6

A slight layer of fat covers the ribs, backbone, and pelvis making them more difficult to palpate. The tummy tuck is present but subtle, and the waistline is visible, though not prominent. Cats have a minimal fat pad.

OVER IDEAL

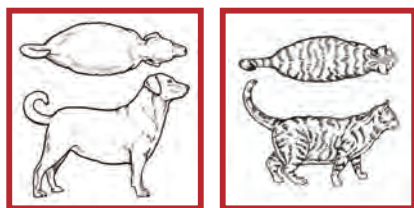

7

A thick layer of fat covers the ribs, requiring pressure to palpate. Difficult to feel the backbone or pelvis. The waistline is not apparent, but the tummy tuck is still slightly visible. Cats have moderate abdominal fat pad.

8

Ribs, pelvis, and backbone are covered by a thick fat layer and are palpable only with extreme pressure. There is no visible tummy tuck or waistline, and both dogs and cats have significant fat deposits in the lumbar area.

OVERWEIGHT

9

Ribs and backbone are not palpable due to a thick fat layer. The abdomen protrudes downward and outward, in contrast to a tummy tuck, with a bulging waistline. Fat deposits are evident on the legs, face, and over the tail base, covering the pelvis. Cats show abdominal distension and extensive abdominal fat.

CANINE & FELINE | FECAL SCORING CHART

SCORE	DESCRIPTION	PHOTO
1	Extremely hard and dry, usually expelled as pellets	
2	Firm, but not hard, with a segmented appearance	
3	Log-shaped, with little or no visible segmentation and a moist-surface	
4	Moist log-shaped, losing its form when picked up	
5	Very moist, lacking a definitive shape, and typically present as piles rather than logs	
6	Has texture but no defined shape, typically found in piles or spots	
7	Watery, with no texture, forming flat puddles

1985

Tom returns to Wisconsin with his wife Kathy and newborn son Bryan to take the reins of the family business after the unexpected passing of his father and grandfather. Tom brings a Chemical Engineering degree from the University of Wisconsin-Madison and professional experience from a Minnesota company.

1980s

Fromm pioneers the use of mixed tocopherols as a natural preservative in pet foods. Mixed tocopherols remain the most popular natural preservative in pet food today.

1990

Fromm "New Formula" is launched with the tag line, "More isn't better. Better is better," referencing protein quality vs. protein quantity. In feeding trials, Fromm "New Formula" measured much higher digestibility than its high-protein rivals.

1999

Fromm Gold is introduced to commemorate Fromm Meal's Golden Anniversary and boasts a blend of duck and chicken with whole eggs, Wisconsin cheese, and added probiotics.

2003

Fromm Four-Star is launched - the market's first variety driven, interchangeable pet food line. Pet parents may rotate between a variety of all life stages recipes.

2009

Fromm purchases and begins retrofitting a vacant late 1960s feed mill in Columbus, Wisconsin, reviving a landmark and expanding the business without a single dollar of outside investment.

2010

With the Mequon, Wisconsin plant running production 24 hours, 6 days a week, Fromm successfully starts producing product at the new Columbus facility, adding 60 Wisconsin jobs and supporting stellar growth.

2014

The first Fromm Petfest is a resounding success. Milwaukee's premiere pet event is a full-day festival boasting thrilling activities for your pet along with live entertainment, shopping, food, and fun for the whole family.

2015

Fromm opens a family-owned-and-operated cannery to expand can offerings for dogs and cats while ensuring the quality and consistency that Fromm is known for.

2018

Fromm opens a treat production facility in Germantown, Wisconsin and launches Crunchy Os, followed in later years by Nutritionals, Tenderollies, and PurrSnackitty Treats.

2020

Fromm becomes The Official Dog Food of Dogs Inc providing quality dog food for working guide dogs and service dogs at no cost to the handlers.

2024

Bonnhill Farms gently cooked, frozen dog food is launched. The small-batch sous vide recipes are prepared in a purpose-built new addition to the family-owned Columbus manufacturing facility.

FIVE GENERATIONS & COUNTING

Tom and Kathy's sons, Dan and Bryan Nieman, representing the 5th generation of the family business, are intricately involved in the business and committed to carrying on the family legacy of quiet innovation.
